

ANIKET MUKHERJEE

CREATIVE OPERATIONS & SYSTEMS ARCHITECT

Kolkata, India | +91 8334973777 | aniket.mu86@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFILE

Creative Operations Leader and Systems Architect with 18 years of experience spanning zero-error broadcast, global enterprise media, and proprietary software engineering. I convert high-pressure creative production into disciplined, scalable delivery systems. Anchored by over a decade of hands-on motion design and visual storytelling, my focus has evolved from producing individual assets to architecting the offline desktop applications, AI-assisted pipelines, and automated workflows that power enterprise studios. I leverage LLM-accelerated engineering (Swift, Python) to eliminate manual operational bleed, securely deploying air-gapped production infrastructure without increasing organizational headcount.

WHAT I BRING

Systems Architecture & DevOps: Python, Swift 6.3, SQLite Schema Design, Standalone Nuitka Packaging, Release Hardening, Zero-Dependency App Bundles

Creative Technology & AI: PyTorch, Local AI Orchestration (DeepFilterNet3), FFmpeg/FFprobe, AVFoundation, Core Animation, OpenCV, JavaScript/ExtendScript

Creative Direction & Operations: 17 Years Broadcast & Media, Workflow Design, Process Democratization, Enterprise Studio Leadership, Global Brand Governance

Creative Toolkit: Advanced Adobe After Effects, Premiere Pro, Photoshop, Illustrator, Audition, Vizrt Broadcast Graphics

PROFESSIONAL EXPERIENCE

Senior Associate & Studio Lead

2024 – Present

PwC Global L&D SDC Kolkata

- Leading enterprise creative production end-to-end, combining creative execution with workflow engineering and technology architecture.
- Hold sole ownership of creative delivery, stakeholder communication, and production quality across video, animation, presentation, and learning experiences.
- Act as a direct partner to global stakeholders, translating complex business requirements and ambiguous creative briefs into scalable production frameworks.
- Replaced external vendor dependencies and manual production bottlenecks by independently architecting a suite of proprietary desktop applications (Global RMS, AVT Suite, Subtitle Studio v6).
- Prototype and deploy solutions to recurring production problems using Python, Swift, FFmpeg, and local AI-assisted workflows.
- Translate specialist production knowledge into strictly governed, accessible tools that enable non-specialists to accomplish complex creative tasks without risking enterprise IP.

Creative Lead, UK Video & Animation

2021 – 2023

PwC

- Built and led a 12-member multidisciplinary creative team delivering 300+ enterprise media assets annually.
- Directed global creative production across video, animation, and visual storytelling while maintaining rigorous quality and brand consistency at scale.
- Developed standardized workflows, production structures, and reusable motion systems to improve team efficiency and delivery speed.
- Worked closely with executive stakeholders to translate business objectives into compelling creative narratives and operational solutions.
- Led the UK Video & Animation team to collectively win the IHAF In-House Agency of the Year, 2021.

Senior Motion Designer & Pipeline Architect

2017 – 2021

PwC

- Designed reusable production templates, motion systems, and creative assets supporting enterprise-scale production.

- Identified repetitive creative-production problems and designed technical solutions to reduce manual effort.
- Eliminated recurring licensing costs through proprietary production assets and automated workflow solutions.

Broadcast Graphics Lead

2015 – 2016

CNN-News18 – Network18

- Single-handedly designed regional broadcast graphics systems from concept through live on-air deployment.
- Created the graphics package for national election coverage within a live, high-pressure, zero-error broadcast environment.

Motion Designer

2008 – 2015

Focus Bangla / Bent Cigarette Productions

- Produced broadcast graphics, animation, and visual content across live programming, entertainment, and long-form television.

PROPRIETARY SOFTWARE ECOSYSTEM & ENGINEERING

OmniPlayer v1.0.0 — Native macOS Desktop Player

STACK *Swift 6.3, AVFoundation, Core Animation, MediaToolbox*

- Architected a native Apple Silicon media player built to eliminate the manual identification and conversion of unsupported codecs.
- Engineered a low-level MTAudioProcessingTap to intercept live PCM audio for 30Hz real-time Core Animation visualization without dropping frames.
- Packaged via a fully automated DevOps release hardening pipeline generating versioned ZIPs, SHA-256 checksums, and architecture validation.

Global RMS — Review Management System

STACK *Python, SQLite, CustomTkinter*

- Engineered a local-first desktop application to replace chaotic spreadsheet/email-based QC with a governed, offline package loop.
- Established traceability across a 14-step review chain with strict SQLite foreign-key enforcement and frame-aware timecode validation.

Subtitle Studio v6 — Stateful Media Editor

STACK *Python, AVFoundation, MPV*

- Conceived and deployed a cross-platform video editing tool for loading media, frame-accurate cue timing, and multi-format deliverable export.
- Features a custom ASS rendering engine for merged backgrounds and precision alignment previewing, passing BGRA frames directly to the UI.

AVT Suite — Aniket's Video Tools

STACK *Python, PyTorch, FFmpeg*

- Built an offline media-processing workstation integrating DeepFilterNet3 natively for local, AI-assisted audio denoising and EBU loudness normalization.
- Packaged as a standalone Nuitka bundle requiring zero end-user runtime installations (no Python, pip, or Homebrew needed) to comply with highly restricted enterprise IT environments.

After Effects Orchestration & Creative Automation

- Built a data-driven typography engine using dual-SRT streams to generate word-level synchronized animation, reducing recurring manual effort by 95%.
- Automated 2D rigging logic from raw SVG coordinate data and built an asset-dependency tracker to standardize motion-design handoffs.

EDUCATION & AWARDS

- Quality Perfectionist, PwC (2022)
- In-House Agency of the Year (IHAF) — won collectively with the UK Video & Animation Team (2021)
- “There is no Box” Innovation Award, PwC (2020)
- Bachelor of Media Science, Pailan College of Management & Technology (2005 – 2008)
